

***Alpine Springs County Water District
Capital Facilities and
Fire Mitigation Fee Expenditure Plan
Annual Update***

FY 2021/2022

***September 2021
Placer County***

Summary of the Mitigation Process

In light of the Tahoe Regional Planning Agency (TRPA) 2012 Regional Plan update and the improving state of the economy, growth is expected to continue in the Lake Tahoe basin. The increase in protection inventory and service population has served to spread existing assets of public agencies over a substantially larger service base. The North Tahoe Fire Protection District has experienced an increase in the amount of building inventory to protect. This development has contributed to an increase in fire protection inventory, requiring a commensurate increase in firefighting infrastructure.

Alpine Springs County Water District is faced with growing capital improvement needs that exceed property tax increments. With the advent of Proposition 218, special tax or assessments are no longer valid revenue sources to keep pace with growth, new service and infrastructure demands. The District is utilizing a proactive approach to continue an existing level of service and to meet the future needs of the District.

Historical data about staffing and inventory have been gathered to develop estimates of adequate staffing levels and capital inventory. This information has been used to develop a fair and equitable mitigation fund equation. The total impact is analyzed by correlation between community growth and the increased need for fire prevention and protection services. The ultimate purpose of the mitigation fees is to provide a continuing level of service rather than a remedy for past development and to hopefully arrest the degradation of service levels.

In 1986 Assembly Member Cortese recognized the need for concise legislation concerning mitigation. AB1600 is the result of hearings. Through delay, the effective date of AB1600 was January 1, 1989. AB1600 enacted Government Code Sections 66000-66003. This in effect requires local agencies imposing mitigation fees to specify the public improvement, segregate the monies collected in special accounts, re-examine the necessity for the expanded balance after 5 years, and refund the balance with accrued interest. In addition, local agencies imposing the fee for defined facility and improvements would be authorized to adopt and annually review a specified capital facilities plan.

AB1600 required the Alpine Springs County Water District to go through an established process to enact a reasonable relationship between a development fee and the specified improvement that it will be used for. In simple terms, the Alpine Springs County Water District cannot arbitrarily charge a mitigation fee without first showing the relationship between impact of development and the fee being charged. Through a thorough analysis in 2007 and 2013 this process was met. In 2015 another thorough analysis was conducted that established and confirmed the relationship between the impact of development and the fee being charged. The most current analysis was conducted in 2018.

The final hurdle was the actual levy of fees. The California Attorney General issued the opinion that Special Districts cannot levy mitigation fees. However, the California Constitution allows Counties and Cities to levy mitigation fees. Through this process and by Resolution Placer County has allowed the Alpine Springs County Water District to realize mitigation revenues. The content of this report will outline the spending plan for those fees in the fiscal year 2021/2022, and a proposal for a mitigation fee adjustment based on the Construction Cost Index (CCI) change for the period September 2020 through September 2021.

Relationship between Growth and Capital Facilities Plan

Alpine Springs County Water District continues to experience growth in fire inventory, as well as population. This trend is expected to continue for years to come. This development has contributed to an increase in calls for service and increased fire potential.

The recent trend of expanding small mountain cabins to expansive resort homes is creating larger homes with larger population potential. Many of these homes are vacation rentals, which carry increased risks with transient guests unfamiliar with the unusual fire and safety risks of forested and heavy snow areas. As the demand for fire and Emergency Medical Services capability increases through infill construction and “teardown” remodels, the ability to transport personnel and apparatus will degrade proportionally. The major arterial routes are periodically congested and the projected increase in residents and visitors will only worsen the problem. The only plausible mitigation strategy is to maintain, upgrade or relocate staffed fire stations where response is timely, and to maintain enough redundancy in apparatus and equipment to act autonomously until assistance can arrive.

The continued growth will impact the District’s ability to maintain the same level of service. The impact of this growth affects three aspects of the organization: (1) Personnel required (2) Fire Stations (3) Apparatus. Capital Mitigation fees may be used for specific items as clearly stated in AB 1600. Personnel cannot be funded with these fees. Development of fire stations and purchase of apparatus are allowed.

Personnel

Personnel cannot be funded with these fees.

Fire Stations

The Facilities Plan indicates the proposed expenditures for all existing facilities and those projected. Mitigation fees can only be used for Facility improvements directly related to growth. Funds shall not be used for replacement.

Applicable California State Codes and National Fire Protection Association Standards

Fire District Station Facilities

The District builds and maintains stations and facilities in accordance with the current California State Building Code, Electrical Code, Plumbing Code and Mechanical Code and Fire Code. Station and Facility construction must all meet requirements of the National Fire Protection Association (NFPA) for construction and maintenance. The following standards are examples of NFPA standards that apply to new facility project within the North Tahoe Fire Protection District.

- Standard 101 – Life Safety Code
- Ch 1.1.2 – The code addresses the construction, protection and occupancy features necessary to minimize danger to life from the effect of fire, including smoke, heat and toxic gasses created during a fire. Ch1.1.3 – The Code established minimum criteria for the design and egress facilities so as to allow prompt escape of occupants from buildings or, where, desirable, into safe areas within buildings.
- Standard 1500 – Fire Department Occupational Safety and Health Program
- Ch 9.1.1 Facility Safety – All Fire Department facilities shall comply with all legally applicable health, safety, building, and fire code requirement.
- A.9.1.1 where health, safety, building, and fire codes are not legally applicable to fire department facilities; steps should be taken to ensure that equivalent standards are applied and enforced. In absence of local requirements, the provisions of NFPA 1; Fire Code NFPA 70; NFPA 101, Life Safety Code; NFPA 5000, Building Construction and Safety Code should be applied.
- In addition, the workplace safety standards specified in 92CFR 1910, Occupation Safety and Health Standards, or an equivalent standard should be applied. Applicable requirements of the Americans with Disabilities Act (ADA) should be met.

Fire Department Apparatus

The North Tahoe Fire Protection District provides fire protection/suppression services to Alpine Springs County Water District and it operates several types of fire apparatus. Structural fire fighting engines are built in accordance with NFPA 1901; water tenders are built in accordance with NFPA 1903 Standard for mobile water supply fire apparatus; wildland fire apparatus are built in accordance with NFPA 1906; the District's aerial fire apparatus will be built in accordance with NFPA 1904.

NFPA Standard 1500 – Fire Department Occupational Safety and Health Program; Ch6 Fire Apparatus, Equipment, and Driver/Operators section 6.1.1 states fire departments shall consider safety and health as primary concerns in the specification, design, construction, acquisition, operation, maintenance, and inspection and repair of all fire department apparatus. The District will continue to meet this standard.

Fire Department Staffing

While staffing and personnel cannot be funded with Mitigation fees; the NFPA standard related to staffing is noted as staffing is an integral portion of fire attack and mitigation.

NFPA Standard 1710 – Organization and Deployment of Fire Suppression Operations, Emergency Medical Operations, and Special Operations to the Public by Career Fire Departments; Ch 4.3 Staffing and deployment states staffing in the fire department shall identify minimum staffing requirements to ensure that a sufficient number of members are available to operate safely and effectively. It is the District’s intention to meet this standard.

The following table from Ch 4.3.2 indicates minimum staffing and response times required by NFPA:

Demand Zone	Demographics	Minimum Staff to Respond	Response Time (minutes)	Meets Objective
Urban Area	> 1,000 people / sq mi	15	9	90%
Suburban area	500 - 1000 people / sq mi	10	10	80%
Rural area	< 500 people / sq mi	6	14	80%
Remote area	Travel distance > 8 mi	4	Directly dependent on travel distance	90%

Accessory Dwelling Units

In accordance with the California Health and Safety Code, Section 65852.2 (3) (A), mitigation fees will be applied to Accessory Dwelling Units (ADUs) as follows:

ADUs less than 750 sq. ft. will not be assessed mitigation fees.

ADUs that are 750 sq. ft. to 1,200 sq. ft., will be assessed mitigation fees at the full per sq. ft. rate.

Physical Facilities & Equipment – Expenditure Plan

As development occurs within the boundaries of Alpine Springs County Water District, new or expanded fire facilities will be required to meet the service demands of future development. Existing fire protection facilities include the Alpine Meadows fire station, a Type II fire engine and various types of special equipment. Total estimated cost of the Water District’s fire station building, land, vehicle and equipment, based on current replacement costs, equals approximately \$1.8 million.

Description	Estimated Cost
Station	\$1,557,179
Vehicle	\$ 180,000
Equipment	<u>\$ 153,487</u>
Total	\$1,890,666

The North Tahoe Fire Protection District in conjunction with the Water District analyzed the fire facilities needed to serve development within the Water District through 2035. Based on that analysis, the Alpine Meadows station can adequately serve future growth anticipated within the Water District through 2035. However additional vehicles and equipment will be needed to serve the additional development expected within the Water District.

Based on current and future development, the Alpine Meadows station will need a new Type I fire engine and equipment to outfit the engine. The current Type II fire engine has a full complement of equipment required by NFPA 1901. The District endeavors to comply with NFPA 1901 by ensuring all apparatus, including a new Type I fire engine carries equipment required by NFPA 1901.

Description	Estimated Cost
Vehicle	\$ 550,000
Equipment	<u>\$ 10,000</u>
Total	\$ 560,000

Ongoing Inflation Adjustment

Mitigation fees are adjusted annually to accommodate the impact of development (growth) on fire protection services within the District. The District adjusts mitigation fees based on the percent change in construction costs as defined in the Construction Cost Index (CCI) published by the *Engineering News-Record*. The need for the District to adjust mitigation fees annually was approved by the Placer County Board of Supervisors, and recommended in the Fire Facilities Impact Fee Study.

Proposed 2022 Mitigation Fee Rate Adjustment Based on the Construction Cost Index Change

Fixed rate pricing structures are unable to keep pace with increasing costs of facilities, vehicles, and general fire protection infrastructure requirements. Thus consistent with the spirit of the enabling legislation, the District has adjusted its mitigation fee schedule for 2022. The District's last mitigation fee structure increase occurred in January, 2021, and was based on the Construction Cost Index (CCI) published by the *Engineering News-Record*. The CCI change for the period September 2020 through September 2021 was 8.40%.

The chart below outlines the existing and proposed rate structure for the mitigation fee schedule.

Fee Schedule

<u>CONSTRUCTION TYPE</u>	<u>2021 EXISTING</u>	<u>2022 PROPOSED</u>
Residential per Sq. Ft.	\$1.38	\$1.50
<u>Nonresidential</u>		
Commercial per Sq. Ft.	\$1.74	\$1.89
Office per Sq. Ft.	\$2.21	\$2.40
Industrial Sq. Ft.	\$1.55	\$1.68

Total \$17,343.94

Alpine Springs County Water District Use Statement

AB1600 states that a District must have a statement of use to which mitigation fees are to be assigned. For the fiscal year 2021/2022, the fire mitigation fees collected within the Alpine Springs County Water District will be utilized towards the following programs:

- **New Fire Engine, Type I, fully equipped:** The Water District currently has a Type 2 engine. The District has determined the need for a Type I engine. This was based on the need for increased pump size and ability to carry more equipment due to increased service demands.
- **Equipment:** The Fire District has recognized the need to add additional equipment to our fire engine. Many of our engines have a full complement of equipment required by NFPA 1901, however some do not. The District endeavors to comply with NFPA 1901 by added new equipment to our fire engine.

NOTICE TO PLACER COUNTY BUILDERS WITHIN THE ALPINE SPRINGS COUNTY WATER DISTRICT

The ASCWD has contracted with the North Tahoe Fire Protection District (NTFPD) for fire prevention services including plan reviews. The North Tahoe Fire Protection District implemented a development Mitigation Fee plan in FY 2014/2015. This year’s plan reflects an inflationary adjustment using the Construction Cost Index (CCI) published by the Engineering News-Record. The CCI change for the period September 2020 through September 2021 was 8.40%.

The fee schedule for 2022 will be applicable to all permit applications processed by the District on or after **January 1st, 2022.** The revenue generated by these fees is designed specifically for capital improvements.

The North Tahoe Fire Protection District will need a set of your plans and a copy of your building permit application to establish your specific fee. The fees must be paid to the North Tahoe Fire Protection District prior to issuance of your building permit.
