INCOMPLETE APPLICATIONS WILL NOT BE ACCEPTED

Review the statements below. Check the boxes once the statements have been reviewed.

Plan review turnaround is 15-business days from the date plan review fees are paid. Do not contact our office during the 15-business day review turnaround. Our staff will not respond to your inquiry. Once your review is complete, our office will contact you via email.

NTFPD does not have authorization to approve vegetation clearance types for projects in ASCWD unless it is for Defensible Space purposes. Final approval for tree removal will still be required from the Bear Creek Association in Alpine Springs. This review will allow for the project to be submitted to the building department.

For projects in the basin, this plan review will allow for the project to be submitted to TRPA and/or building department to begin the permitting process.

For projects in the basin and in Alpine Springs, this plan review will not allow you to pull your building permit.

Review the submittal requirements below. NTFPD is no longer able to approve plans with conditions. If any of the requirements are missing, plans will not get approved and will be subject to resubmittals and resubmittal fees. All resubmittals trigger a new 15-business day turnaround.

Landscape/Access Commercial Plan Check (LAC):

Check the requirements to ensure all are met prior to submitting.

A Site Plan is needed to complete this review. The site plan must include all pertinent information regarding the construction project, a compass, and a scale.

Applicable building codes and standards must be noted on the cover sheet, including the NTFPD or MBFPD amended fire code.

The site plan/submittal must include the following:

Fire apparatus access and roadway/driveway standards for width, height, clearance, slope, weight loading and radius curves.

Length of the driveway with turnouts and/or turnarounds.

Fire hydrant access/location - distance of the hydrant to the furthest point of the building; through an approved route of travel.

Hydrant flow data from NTPUD, TCPUD, or NTFPD Staff.

Vegetation clearance types (If in ASCWD, final approval will still be required from Bear Creek Association).

Building setbacks.

Pre-Development Meeting Findings/Alternate Materials and Methods Request (If applicable).

The approved LAC needs to be submitted to TRPA and/or the Placer County/EI Dorado County building department to begin the permitting process. This plan review will not allow you to pull your building permit.

This review is one of two NTF reviews required prior to permit issuance. I understand that an approved Commercial Design Review (DRC.2) will be required for this project to allow for permit issuance from the Placer Co./EI Dorado Co. building department.

I hereby acknowledge that I have read the Fire District's requirements above for plan review. Furthermore, I acknowledge that if any of the requirements are not complied with, the plans/project will fail review and will be subject to resubmittals and resubmittal fees. By signing below, I am verifying that I have met the requirements for this submittal.

Signature _____ Date _____
